

Why Is Dan Reale Running for Congress?

- According to former GAO Comptroller David Walker, the United States has over \$50 Trillion in unfunded obligations and liabilities. If the Congress keeps spending at its current rate or more, this will lead to the financial collapse of the US economy. It will be far worse than the Great Depression. More of the same Democrat and Republican welfare/warfare state will guarantee financial collapse.
- Social Security is being raided, in its entirety, during every session of Congress. Medicare is effectively insolvent.
- We have our military in over 130 countries. Our country is relatively undefended.
- The Federal Reserve debases the savings and increases the prices the poorest Americans and employees pay. Wall Street and banks receive virtually all of the benefits. Most Americans are net debtors, carrying an average of around \$2,000 in credit card debt.
- The consequences of monetary and preferential trade policies have virtually gutted our manufacturing base. Now, the CAFTA agreement and WTO are working on offshoring our service jobs.
- Illegal immigration is subsidized and out of control. California must now build a new school every day in perpetuity to keep up. Among other costs will be the loss of seats in the US House for non border states in the next census.
- The US Bureau of Labor Statistics has doctored inflation data to deprive Social Security recipients of at least 43% of what they should be receiving.
- Half of the wages of Americans, directly and through increased costs related to other taxes, go to funding government in the United States. According to the US Bureau of Economic Analysis, government represents half of US GDP. The private sector cannot support this.

Don't wait until other people start voting for liberty. Be the first. Real change starts with you.
